## PRODUCT OVERVIEW

## USER MANUAL

**IMPORTANT SAFETY PRECAUTIONS:** Before use please note the following safety precautions. Failure to comply may be dangerous and cause damage to your mobile electronic devices.

- The power bank unit contains an internal 4000mAh lithium polymer battery. Upon initial use or after a prolonged period of storage, fully charge the unit before use. The unit will reach its maximum performance after 2 or 3 full charging and discharging cycles.
- Using an incorrect power adaptor or USB cable could cause damage to both your mobile devices and the Power Bank.
- Do not submerge in water or expose to adverse weather conditions.
- Avoid dropping the device.
- Keep the device away from fire and high temperatures.
- Keep the device out of reach of children.

### SPECIFICATIONS:

Capacity: 4000mAh / 3.7V – Lithium Polymer Battery.

Input: 5V  $\overline{\text{---}}$  1A.

Output 1: 5V  $\overline{\text{---}}$  1A. Output 2: 5V  $\overline{\text{---}}$  1A.

Battery Life: More than 500 charging cycles.

Electric charge indicator: 4 LEDs

Solar charge indicator: 1 LED.

Emergency Led Light.

ON/OFF Button.

Micro USB cable included.

### INSTRUCTIONS:

· Indicator light: During the electric charging process of the power bank the blue lights of the charge indicator will start to flash. As the charging process is completing the lights will start to remain solid. When a mobile device is connected to the power bank the indicator lights will appear, according to the charge level available on the unit. During the charge transmission, the power of the portable charging device will decrease and the lights on the charge indicator will start to disappear indicating the remaining charge capacity available. Every light represents 25% of the total charge.

Note: The battery of your power bank will not get completely discharged during the charging process of your mobile device. It will stop charging but you could still use the emergency light.

During the solar charging process of the power bank, the green indicator light will remain on. If the solar panel does not receive any form of light, the indicator light will remain off.

- Emergency led light: Press twice  button to switch on/off the emergency light.
  - Charging the portable power device: Connect the micro USB connector cable to The (IN) port on the portable charger.
  - Charging mobile devices: Connect the USB cable to the mobile device using the appropriate connector. Connect the other end of the USB cable to the (OUT) port of the portable charger.
  - Press the  button to see the power status of the portable charger.
  - Remove the USB cable at the end of each process.

This symbol both in the product and its user manual indicates that at the end of the devices electrical life, it should be recycled separately from your household waste. There are adequate means to dispose of this material for proper recycling. For more information, contact your local authorities.
